

**SPECIAL EDUCATION:  
Law, Identification, Education,  
Advocacy**

For more than 20 years, LDA of CT has led the way in providing training to parents and professionals about learning disabilities and related disorders. Class participants are enthusiastic in praising the knowledge and quality of our presenters, the resource notebook they compile week by week, and the referral resources they acquire. As a result of these seminars, participants are able to be active and knowledgeable members of IEP meetings and to work with others as parent advisors.

# KNOWLEDGE IS POWER...

This series of seminars provides parents and professionals with critical information about learning disabilities and appropriate educational programming for children with difficulty learning. Participants gain valuable information about the IEP process, laws governing special education services and conflict resolution.

Sessions are taught by experienced professionals. At the completion of the series, each participant will have a binder of valuable resources on all topics covered in the course. Sessions provide the opportunity to network with people of similar interests and presenters who offer needed services.

## Who should attend?

Parents, Educators, Advocates, Lawyers, Social Workers, Consultants, YOU
